W. W. Hay, Rosenstiel School of Marine and Atmospheric Sciences, University of Miami,  
Miami, Florida

### INTRODUCTION

The zonation used here is that of Boudreaux and Hay (1969) for the Pleistocene, Martini and Worsley (1970) for the Neogene, and Hay *et al.* (1967), Bramlette and Wilcoxon (1967) and Hay (1970) for the Paleogene.

All samples were examined, although in most instances time permitted only a cursory inspection for this preliminary determination.
