

Volume 94: Chapter 49: Figure 4. Bathymetry of King's Trough in corrected meters showing the locations of detailed dredge and rock core sampling at King's Trough Axis and Palmer Ridge and of drilling at Site 608. A basic map constructed by Searle and Whitmarsh (1978) was modified to match sonograph coverage for Kidd et al. (1982). This version includes new sounding data collected for Kidd et al. (1983), compiled and redrafted by Peter Hunter at the Institute of Oceanographic Sciences.
